

Investment Strategy

The Boston Trust Midcap Fund seeks long-term capital growth through an actively managed portfolio of equity stocks of mid capitalization companies. The Adviser pursues the Fund’s investment objective by investing primarily (at least 80% of its assets) in a diversified portfolio of equity securities of mid cap companies. For these purposes, the Adviser defines mid cap issues as those with market capitalizations between \$500 million and \$15 billion. However, the Adviser expects that at initial purchase most of the issuers will have market capitalizations between \$2 billion and \$10 billion.

The value of Fund shares are subject to loss primarily related to stock market risk and the risks associated with mid cap stocks which may be more volatile than those of larger, more established issuers. The Fund is not appropriate for investors who plan to invest for a period of time less than 3 to 5 years, are not comfortable with market fluctuations, or those seeking current income.

Investment Performance

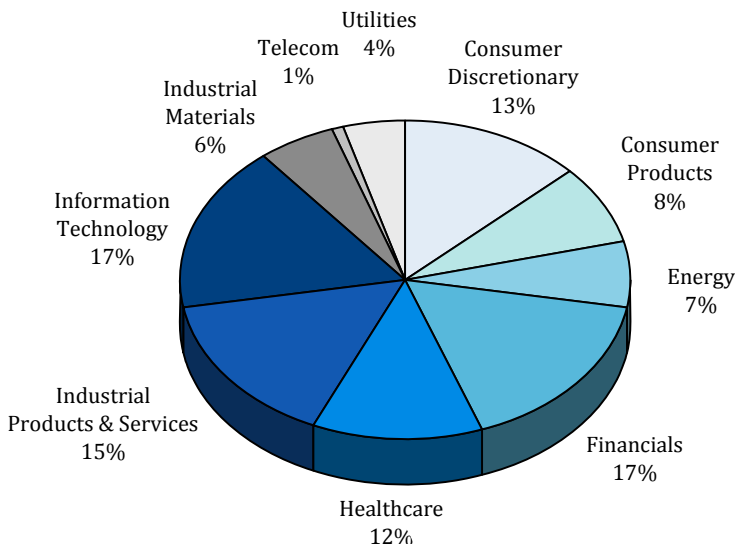

NAV: \$8.94	2Q 2010	YTD	1 Year	Since Inception (9/24/07)
Boston Trust Midcap Fund	-5.30%	2.05%	24.68%	-3.05%
Russell Midcap Index*	-9.88%	-2.06%	25.13%	-8.40%

Performance represents Fund shares indicated at NAV. Fund has no sales charge and the gross expense ratio is 1.50%. The Adviser annually executes an expense limitation agreement and Fund net expenses are currently (and have historically been) limited to 1.00%. Past performance does not guarantee future results. The performance data quoted represents past performance and future returns may be lower or higher. The investment return and net asset value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month end, please call 1-800-282-8782 ext. 7050.

The recent growth rate in the stock market has helped to produce short-term returns that are not typical and may not continue in the future. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes.

**The Russell Midcap Index is an unmanaged market-capitalization-weighted index that measures the performance of the stocks of the 800 smallest companies in the Russell 1000® Index (which consists of the 1,000 largest U.S. companies based on total market capitalization). The Russell Midcap Index returns assume the reinvestment of dividends paid on the stocks constituting the index. You may not invest directly in the Russell Midcap Index and the index does not incur fees and expenses.*
